## **About the Port of London Authority (PLA)**

Covering 95 miles of the tidal River Thames, the PLA works to keep commercial and leisure users safe, protects and enhances the environment and promotes the use of the river for trade and travel.

As a Trust Port, we hold the river in trust, working to hand it on in a better condition to future generations.

A not-for-dividend organisation, we retain any financial surplus generated, and are consequently uniquely placed to make targeted, strategic investments to support delivery of our strategy, Thames Vision 2050.

Alongside improving the river, our principal responsibility is enabling people to use the tidal Thames safely. We engage actively and openly with stakeholders through a range of forums, throughout the year.

**ALL TIDAL AND ASTRONOMICAL DATA ARE IN  
GREENWICH MEAN TIME – ONE HOUR MUST BE ADDED AT  
ALL TIMES WHEN BRITISH SUMMER TIME IS IN FORCE.**

**CONTENTS**

BST will be kept in Great Britain from 0100 31 March 2024 to 0100 27 October 2024.

The DATUM or zero of the predictions for tidal information in this publication is the same as that used on PLA and Admiralty Charts. The relationship of this Chart Datum and Ordnance Datum (Newlyn) is given on page 19.

In addition to this publication, predictions are also available on the PLA Website ([pla.co.uk](http://pla.co.uk)) in a user customisable format.

The sun and moon data (pages 80-85) are © Crown Copyright and/or subject to database rights. Reproduced by permission of the Controller of His Majesty's Stationery Office and the UK Hydrographic Office ([www.gov.uk/hydro](http://www.gov.uk/hydro)).

The information in this publication is correct at the time of going to press (November 2023). The PLA does not accept responsibility in law for the information in these tables.

Further information can be obtained from

**[www.pla.co.uk/hydrography](http://www.pla.co.uk/hydrography)**

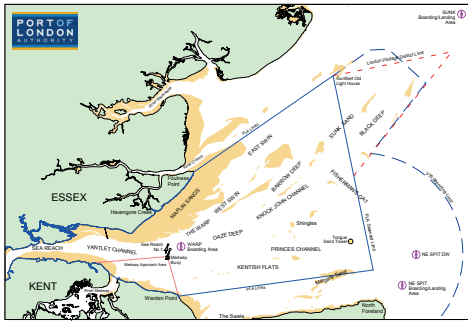

**NOTE:**

**Low Water levels in the upper reaches of the tidal Thames are greatly affected by the land water flow at Teddington Weir. They frequently fall below chart datum when this flow is significantly reduced, typically during the summer months.**

## PORT LIMITS

Port Limits are described in Schedule 1 of the Port of London Act 1968 (as amended) but in general terms include the tidal Thames from Teddington, encompassing both banks up to mean high water, eastward to Foulness Point in the north and Warden Point in the south. In the estuary the limits extend from Foulness point to Gunfleet Old Lighthouse, thence to a position 3 miles north of Margate, and back to Warden Point. The port limits exclude the River Medway and certain other creeks and rivers.

## PILOTAGE

### 1. London Pilotage District Limits

These are fully described in current Pilotage Directions and can be described as the same as the Port Limits, but from Putney Bridge seaward and extend beyond port limits to the north east to the Long Sand Head.

### 2. Pilotage Directions

Information regarding the latest Pilotage Directions and regulations relating to the ordering of pilots and the issuing of Pilotage Exemption Certificates are contained in current Pilotage Directions, copies of which may be obtained from the Pilotage Service Administration Office, Navigation Publication Enquiries or PLA website [www.pla.co.uk](http://www.pla.co.uk)

### 3. VTS Area

The VTS Area for London VTS is from Teddington Lock in the West, to the boundary of the Sunk Precautionary Area in the North, thence to the London Arrival/Departure Arc in the East. London VTS has a comprehensive Traffic Image of the entire VTS Area based on radar from the seaward limits of the VTS Area to Greenwich and AIS coverage throughout the area.

\*\*Thames Barrier Control Zone — The river between Margaretness and Blackwall Point is subject to special navigational requirements concerning passage through the Thames Barrier. Mariners must observe traffic signals displayed on the barrier piers which indicate those spans open to navigation. Instructions will also be broadcast by TBNC on Channel 14.

For full details of navigational requirements for the Thames Barrier Control Zone, refer to the current General Direction for Navigation in the Port of London and Pilotage Directions. Details of planned closures are published by PLA Notices to Mariners twice each year.

## RIVER THAMES — DESIGNATED ANCHORAGE BERTHS Cont'd

- Notes 1. W1 & 2 anchor berths are normally used for staging large vessels. K3 may be used by other vessels provided a LNG vessel is not expected.
2. Depths shown in these berths are correct at the time of going to press. More recent information may be available from Port Control Centre, Gravesend.
3. To be used primarily by vessels awaiting clearance of restricted visibility as per the Pilotage Direction. Usable in clear visibility by small to medium sized vessels, subject to approval given by Port Control.

### DIRECTIONS TO VESSELS ANCHORING

General Directions for Navigation in the Port of London states:

#### 22. WAITING AND ANCHORING

- (1) Reporting Vessels may only wait for a berth in the Thames:
  - a) at a mooring allocated to the Vessel by London VTS for that purpose, or
  - b) in a Designated Anchorage. Except with the permission of London VTS.
- (2) Vessels are not permitted to wait or anchor:
  - a) in a Designated Anchorage for longer than the period (if any) specified for anchoring in such an area by the PLA;
  - b) in a Designated Anchorage where the Vessel's dimensions would normally preclude it using that anchorage; or
  - c) in a Fairway, other than for the purpose of manoeuvring. Except in an emergency, or with the permission of London VTS.

#### DEFINITIONS

- j) "*Designated Anchorage*" means an area designated by a Harbourmaster as an anchorage area or berth and published on charts, in the PLA Handbook of Tide Tables and Port Information or in Notices to Mariners;
- l) "*Fairway*" means a regular course or track of shipping, comprising all marked and/or charted navigable channels within the Thames and includes the following areas:
  - i) The Fisherman's Gat;
  - ii) The Princes Channel from the Tongue Sand Towers to the Oaze Precautionary Area;

River Thames - **Thames Barrier Control Zone**: Margaretness to Blackwall Point.

Full details of navigational procedures in the **TBCZ** are contained in **General Direction 27 and Appendix** for Navigation in the Port of London.

The availability of spans for navigation are marked as follows  
 Red St. Andrew's Crosses (Lt) from Piers = Barrier or Span Closed.  
 Green Arrows (Lt) from Piers = Span Open.

In low visibility, high-intensity directional fixed white lights operate on either side of spans C, D, E and F in conjunction with the green arrows. The intensity of these lights is variable and may be adjusted on request to London VTS at TBNC

It is extremely dangerous to go through a Span that is marked Closed (for navigation), the gates may be in a semi-raised position.  
 Small Craft: Do not navigate above Thames Refinery jetty or below Royal Wharf unless intending to pass through the Barrier.

**Depth over sill: Spans C, D & E, F = 5.8m. C.D. Spans B,G = 1.2m. C.D.**

Call **London VTS** (Barrier Control) on Channel 14 at Margaretness and/or Blackwall Pt for permission to pass through the Barrier. If no VHF Radio then pass through the span marked by Green Arrows furthest to the starboard side of the channel.

**Vessels fitted with an engine should use motor power to navigate through the Thames Barrier.**

### CHART DATUMS & STANDARD LEVELS IN THE PORT OF LONDON

1. **Chart Datum** is set to approximately the level of Lowest Astronomical Tide (L.A.T.)

2. **Low Water levels** in the upper reaches of the tidal Thames are greatly affected by the land water flow at Teddington Weir. **They frequently fall below chart datum** when this flow is significantly reduced, typically during the summer months.

3. **Maintained level** and chart datum above Richmond half tide weir are both 1.72 metres above Ordnance Datum (Newlyn).

4. **Trinity High Water (T.H.W.)** is deemed, by the Port of London Act, 1968, to be a level having a value of 11.4 feet (**i.e. 3.475 metres**) above Ordnance Datum (Newlyn).

## TABLE OF AVERAGE TIME DIFFERENCES

The times of high and low water at the following places on the River Thames may be found **approximately** by applying the differences shown to the times of high and low water given in the Tide Tables.

### RICHMOND LOCK & WEIR

The sluice gates at Richmond Weir are raised approximately 2 hours before and 2 hours after high tide at Richmond Lock, depending on fluvial flows. In periods of unusual low and high fluvial flows, please contact the Lock Foreman for an up-to-date assessment of when the weirs will be raised. During this period, passage through the navigation spans of Richmond Footbridge is available. At all other times Richmond Lock may be used: length 76.2m width 7.9m for which there is a charge. This information can also be found in the PLA Charges book, or on the LED screen at Richmond Lock. Predicted times and heights of high and low waters are available for Richmond Lock at [www.pla.co.uk](http://www.pla.co.uk)
